

Comparing Numbers With Decimals

Note: 2-8 = their value, A = 0 and 10 = 1. Jack, Queen, and King do not count and should be set aside.

1. The younger player goes first
2. Choose 1 card from the deck
3. Write the number you choose in one of the places on the chart.
4. Proceed to Player 2
5. When all 8 places are filled out, determine if player 1 or player 2 has the larger number.
6. Say the number and then write the comparison sentence on page 2.
